

eQuilibrium® Standing Technology introduces a revolutionary shift in postural behaviour for the individual who is on their feet for work, recreation or rehabilitation.

eQuilibrium® takes standing to a new level for **stability, comfort and strength**. eQuilibrium changes the way our muscles and balance system works to help relax and strengthen our joints as we stand and move about.

eQuilibrium® helps reduce muscular stress while improving vascular activity and enhancing overall productivity.

Clinical Trial conclusions comparing eQ2

Almond to flat Floor Standing:

“There was a positive effect of reduced low back pain during standing for pain developers when the eQ2 Almond was compared to standing on a level surface... The eQ2 Almond creates a favourable postural variability in both pelvic and lumbar spine angles...The eQ2 Almond appears to introduce changes in standing style that result in beneficial reductions in low back pain during prolonged standing exposures...The positive outcomes were supported in the satisfaction rating of the participants, with 87.5% indicating that they would use the eQ2 Almond if they were in an occupational setting that required prolonged standing work”

eQuilibrium®, eQ, Suite of Products

eQuilibrium®, eQ, represents a family of energy platforms for standing; uniquely designed to provide

natural solutions for relief of back pain

and standing fatigue

as well as neck, shoulder, hip knee and foot issues.

“My name is Jose Sanchez; I am 56 years old and work for PowerComm Inc. for several years...

I suffer from hereditary varicose veins. When I am standing for too long in the same position my feet and legs start to swell and get very tired.

For the last couple of years I have used, in my workstation, a special platform made out of fiberglass which has given me positive results. The pain in my legs and feet are gone and at the end of my shift I do not feel tired as I used to. Also my spinal column does not feel the effects of standing for 8 hours as before”.

All eQ products are manufactured for a lifetime of use and all eQuilibrium products accommodate significant weight support capabilities. Our Commercial/ Consumer platforms are manufactured using Vacuum Formed Wood Laminate Technology.

Available colours include Tile Red, Grey, Black and Safety Yellow

eQ Standing Technology

eQ1 Sliver: For use up against a counter or as an anti-Fatigue device for a raised desk. Upslope standing only.	\$149.00
